Quality

Quality Events on the CARA Life Sciences Platform™

Quality Events give you a way to capture everything that takes place in your business, planned or unplanned, that has to be managed for Quality – from audit findings to complaints, deviations and planned changes.

Capture all Quality-related items in an Event

CARA allows you to capture a wide variety of Quality Events: from Deviations and Customer Complaints to Audit findings, non-conformities, regulatory commitments, or other internal / external triggers. They are all handled using similar processes, with fields and workflows adapted to each type of event, but also allowing you to define your own events.

Link events to your QMS, RIM, and other parts of the platform

Once you have created events, you can link them to CAPAs as well as the Change Requests and the underlying documents. This gives you immediate traceability through the chain of linked data and documents.

Additionally, Quality Events can be used as triggers the RIM module of the CARA Life Science platform e.g. to initiate new submissions, answers to HA questions, process renewals and Labelling updates.

What is the CARA Life Sciences Platform?

The CARA Life Sciences platform is an enterprise cloud for managing content, data, and business processes through a platform of seamlessly connected apps.

For the first time, the platform provides a vast selection of out-of-the-box solutions for Regulatory, Quality, Safety, and Clinical, combined with the ability to rapidly design & implement other low-code apps to manage your unique processes and requirements.

We believe in a true enterprise platform, where information from all parts of your business can drive and automate work without additional systems and integrations. That's why you can add new applications and use cases to the platform with no additional licensing.

Begin the digital transformation of your business today, by choosing an enterprise platform that gives you the freedom to innovate for tomorrow.
