

# SPOR Subscription on the CARA Life Sciences Platform™

Our SPOR Subscription module is a module that allows companies to map their data to SPOR master data, including notifications and updates. Designed for companies of any size, and directly providing the master data vocabularies to the rest of the CARA Life Science platform or other third party systems in-house

## Mapping & Updates

Our CARA SPOR module connects to the EMA SPOR database to retrieve values, and process updates. It can also be used by our customers to submit updates

## Provide data to your other systems

Having all the SPOR data in the CARA Life Science platform allows you to use the vocabularies in the CARA RIM, or Clinical or Safety modules. Additionally, using the CARA REST API you can push the data to other third party systems you use such as SAP, and/or have them query CARA to retrieve the values

## Notifications

Once you subscribe to SPOR items in CARA, you will get notifications of all updates to those items, as well as notifying you of non-subscribed items that might be of interest, or suggesting matches to updated items

## Subscription tiers

We charge for the SPOR Subscription based on the following Tiers:

- FREE: Subscribe to up to 10 items
- BRONZE: Subscribe to 11-50 items
- SILVER: Subscribe to 51-100 items
- GOLD: Subscribe to 101+ items

## What is the CARA Life Sciences Platform?

The CARA Life Sciences platform is an enterprise cloud for managing content, data, and business processes through a platform of seamlessly connected apps.

For the first time, the platform provides a vast selection of out-of-the-box solutions for Regulatory, Quality, Safety, and Clinical, combined with the ability to rapidly design & implement other low-code apps to manage your unique processes and requirements.

We believe in a true enterprise platform, where information from all parts of your business can drive and automate work without additional systems and integrations. That's why you can add new applications and use cases to the platform with no additional licensing.

Begin the digital transformation of your business today, by choosing an enterprise platform that gives you the freedom to innovate for tomorrow.
